Education

- 2022–2026 **B.S. in Computer Engineering (Graduated)**, *University of Tehran*, Tehran, Iran, GPA: 18.31/20 (Rank: 12/81)
Granted Direct Admission to Master's Program (Exceptional Talents quota) without entrance exam.
- 2018–2022 **High School Diploma, Physics & Mathematics**, *Imam Khomeini Exemplary High School*, Shahin-Shahr, Iran
Ranked 144th in National University Entrance Exam.

Professional Experience

- 2024–2025 **Computer Vision Intern**, *Rahtab Co.*, Isfahan, Iran
Worked on computer vision solutions for agricultural and livestock applications.
- Assisted in developing a cattle identification model using metric learning on nose patterns (ResNet, Custom CNNs).
 - Trained a YOLOv8 object detection model on custom datasets for automated broiler chicken counting.
 - Helped build a basic Persian web UI to test and demonstrate model predictions.

Key Projects

Deep Generative Models Coursework

PyTorch, Python

Implemented several generative model families as part of university course assignments, including Diffusion Models (DDPM, DDIM), Flow Matching, Score-Based Models, and Energy-Based Models. Gained hands-on experience with PyTorch and theoretical concepts like score matching and density estimation through academic exercises.

CPY Language Compiler (3-Phase)

Java, ANTLR, Maven

Developed compiler infrastructure with parser/AST generation, name analysis, and type checking. Implemented Dead Code Elimination optimization and memory leak detection security analysis. Engineered symbol table management with scope analysis and comprehensive error reporting.

5-Stage Pipelined RISC-V Processor

Verilog, Digital Design

Designed and implemented a 32-bit, 5-stage pipelined RV32I processor from scratch in Verilog. Engineered a complete Hazard Detection Unit with data forwarding paths to resolve pipeline conflicts.

Technical Skills

- Languages Python, C++, Java, JavaScript, C, Verilog, SQL
- AI & ML PyTorch, TensorFlow, Scikit-learn, Transformers, OpenAI APIs
- Vision & Data YOLOv8, OpenCV, NumPy, Pandas, Matplotlib, Plotly, Albumentations
- Specializations Generative Models (Diffusion, VAE, Flow Matching, EBM), Computer Vision, Metric Learning, LLM Applications
- DevOps/Tools Docker, Git, Streamlit, PyQt5, Google Colab, Linux/Unix, ANTLR, Maven

Languages

Persian Native

Certifications & Honors

- 2024 Direct Admission to Master's Program (Exceptional Talents quota) - University of Tehran
- 2022 National Entrance Exam Rank: 144th nationwide
